Hello Vina Stakeholder Advisory Committee:

At the last meeting, SHAC members requested more information about models being used in the region. See email below from Christina Buck with more information.

SHAC Members,

As a follow up to the SHAC's discussion about interbasin coordination and model documentation, our neighboring subbasins are adapting and updating SVSim and C2VSim Fine Grid models to support GSP work and water budgets. Both of these models were originally and are actively being developed by the Department of Water Resources (DWR). The link below contains data sets and documentation for SVSim. Unfortunately, C2VSim Fine Grid does not yet have available documentation from DWR. See below.

SVSim: <https://data.cnra.ca.gov/dataset/svsim>

C2VSim Fine Grid: beta version of the model is available and being updated by GSAs, but no documentation has been released. DWR is working toward releasing the next model version with documentation by the end of the year. https://data.cnra.ca.gov/dataset/c2vsimfg_beta2

BBGM: documentation currently being updated

Best,
Christina

Hi Tania,

Items that I plan to bring up at the Nov 17 meeting include:

INTERBASIN COORDINATION MEETINGS: is there a robust administrative record of the meetings to date? When will public outreach be extended to these meetings?

MODELING: Do basin setting and water budget reports rely on peer reviewed models?

What models are being employed in the Vina and adjacent sub-basins? Have Interbasin Coordination meetings discussed regionally accepted models?

Looking forward!

Jim

Hi Jim,

Thank you for informing us of the inter-basin questions you plan to bring to the SHAC meeting on November 17th. We look forward to updating the SHAC and participating members of the public at that time about on-going inter-basin coordination efforts. We

also look forward to a more in-depth presentation and discussion of inter-basin coordination at the December SHAC meeting.

Best,

Tania
